

CSA Membership Benefits Overview

Tap into the collective knowledge of the security community and enjoy the following benefits when you join the Cloud Security Alliance. Our activities, knowledge and extensive network benefit the entire community impacted by cloud – from providers and customers, to governments, entrepreneurs and the assurance industry – and provide a forum through which diverse parties can work together to create and maintain a trusted cloud ecosystem. Memberships are available for both solution providers and enterprises. Depending on your membership type, your organization will be able to leverage these benefits in different ways.

Executive Briefings

Executive briefings give your team access to subject matter experts to discuss cloud-specific platforms, industry trends, and technology implementations. During these sessions, we provide a forum where you can interact with the experts, share strategies, and exchange information in a closed-door environment.

Research Engagement

Employees who engage in conducting research can build their expertise while also ensuring that best practices and standards for the cloud are implemented within your organization. Other benefits include early access to CSA research before its available to the general public, priority access to research analysts, and the opportunity to lead specific areas of research.

Industry Collaboration Sessions

Collaboration sessions are an opportunity to learn from your peers and participate in a roundtable discussion with other executives. These sessions are reserved for enterprise users to discuss strategic concerns and collaborate on possible solutions.

Ask the Experts

Members can seek private, vendor-neutral advice from subject matter experts within CSA. Start a conversation around what you're doing, and we can help connect you with the right people to talk through that strategy.

Membership Spotlight Calls

Broken up by membership benefit, these calls allow members to stay up to date on the latest CSA opportunities for event sponsorships, research, webinars, speaking opportunities and more.

Certification & Training

Members are given free seats to the course/certification of their choice along with special volume discounts on training, exam tokens and more when purchasing in bulk for teams.

Threat Intelligence Exchange

CSA corporate members receive two complimentary seats for the cyber threat intelligence exchange. SOC operations teams can leverage this platform to quickly and anonymously collaborate with other members on attack mitigation and solutions.

Tools for Due Diligence

Gain access to security and privacy tools for your team. As the industry needs evolve, the CSA community creates tools for due diligence to help organizations address challenges they are currently facing. These tools are created for the community by the community.

International Standardization Council

Manage relationships with the standards bodies and accelerate your ability to navigate the standards space. Joining the standardization council through CSA makes it accessible to participate in discussions around international standards and provides members new to the standardization world with a clear path to becoming more involved.

CSA Events

Learn from cloud experts and network with users, providers and government representatives during CSA events. As a member, your company will have access to exclusive discounts, sponsorship opportunities, complimentary passes and speaking opportunities.

Branding with CSA

Corporate members are entitled to display their corporate logo on the CSA website. This helps demonstrate thought leadership by showing the industry that you are part of an elite group driving cloud security.

Community Interaction

CSA's online communities are a forum for vibrant online discussions. Members are permitted to post thought leadership pieces, job postings and other relevant items to these communities.

CSA Webinars

Our webinars are designed to inform our audience about trending topics, new technologies, and the latest research. As a member, you can showcase your subject matter experts and introduce your company to an audience with a proven interest in cloud computing related topics, trends and challenges.

Media Engagement

Gain assistance with news releases and white papers. As a member, you can request quotes from CSA experts, access our press release template, cite CSA research (with attribution), and coordinate press releases for any CSA related announcements.

Social Media & Blog

Leverage CSA's social media channels to share relevant news, insights and resources. As a member, you also have the ability to become a part of a valuable thought exchange by submitting articles to the CSA blog, or cross-posting from your corporate blog.

Security Transparency

Validate the security posture of your cloud offerings by posting to our Security Trust Assurance and Risk (STAR) Registry. As a member you receive priority listing when submitting a self assessment to our registry.

Coming in 2021...

Look for some exciting new benefits to be added to our membership portfolio in 2021. Talk to a membership representative to learn more.
